Customer Churn & Retention Analysis

Datasets: RavenStack synthetic SaaS (credit: River @ Rivalytics) and Telco Customer Churn (Kaggle).

• `analysis.py` – pandas analysis (churn, cohorts, segments, support, lifetime) -> `results.json`, `dashboard.html`

• `dashboard.html` – interactive retention dashboard (open in browser)

Headlines

SaaS: 22% account churn; DevTools, event-referred, Germany and trial accounts churn most; plan tier/support don't differ.

Telco: 26.5% churn; month-to-month (43%), first-year tenure (47%), fiber, e-check, no tech support, seniors are risk groups.

Note: RavenStack is synthetic – small gaps may be noise.
